TITLE	Ohio's School Libraries/Media Centers; A Statistical Report With Comments.
INSTITUTION	Ohio State Library, Columbus.
PUB DATE	Oct 73
NOTE	134p.
EDRS PRICE	MF-$0.65 HC-$6.58
DESCRIPTORS	Elementary Grades; *Instructional Materials Centers; Junior High Schools; Librarians; Library Expenditures; Library Materials; *Library Surveys; Media Specialists; *School Libraries; Secondary Grades; *State Standards; *State Surveys; Statistical Surveys
IDENTIFIERS	*Ohio

ABSTRACT

A statistical survey was made to gather information on certificated personnel, materials and expenditures in school libraries and /or media centers in Ohio. Data were collected by means of a questionnaire sent to all schools, grades K-12, in the state. Results indicated that there was a critical shortage of trained personnel, that material collections needed to be expanded and that per capita expenditures were too low. State standards recommended that at least 3900 schools should be served by one or more certificated specialists, but only 1182 such professionals were employed. Statewide figures showed an average of 8.6 books per pupil, but individual schools varied greatly and only 56% met the state requirement for library expenditures per student. Additional, improved studies were recommended to keep track of changes over time and to begin to assess the quality, as opposed to merely the quantity, of library resources and services. An extensive series of tables is included in the report, providing detailed data on state standards and on actual expenditures, materials, and personnel employed. (PB)

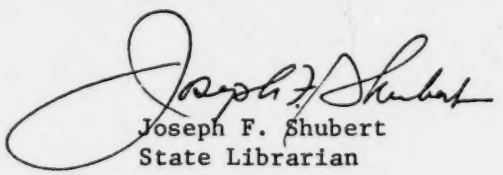
Foreword

This paper reports on the first step in a cooperative data collection program initiated in 1972 by the State Department of Education and The State Library of Ohio. The planning and initial work on this 1972 survey was done by Richard M. Cheski, Assistant State Librarian for Library Development and John E. Brown, Director of the Division of Elementary and Secondary Education in the State Department of Education. Cynthia McLaughlin, Administrative Specialist in the Library Development Division, edited the data and prepared this report.

This survey was based on discussions which grew out of a May 1972 meeting with Anne Dietrick of the National Center for Educational Statistics, Washington, D.C. The encouragement of Dr. Martin Essex, Superintendent of Public Instruction, was fundamental to this undertaking, and appreciation is expressed to him, to the principals and school district personnel who supplied the data, and to the school library supervisors, media specialists, and others who took time in August 1973 to review and comment on the draft of this paper.

Comments on this analysis, identification of errors, and suggestions for improvement of this data collection program are welcomed.



Joseph F. Shubert
State Librarian

Introduction

The Principal's Report form which the Department of Education sent to each Ohio school in September, 1972 included a questionnaire which had been prepared in cooperation with The State Library of Ohio. This questionnaire requested statistics for the school libraries/media centers in Ohio's public and non-public schools, grades K-12 including personnel, materials, income and expenditures.

State Library staff edited the information which was tabulated by computer in the State Data Center. The data was printed, in part, in the Ohio Directory of Libraries, 1973[1] and is the basis for this report. A brief summary of the data also appeared in NEWS FROM THE STATE LIBRARY #144 (October 10, 1973, p. 76).

The State Library conducted this study because although statistics on Ohio's public and academic libraries are collected annually, no comparable current statistics on school library resources existed. The lack of these statewide statistics made it impossible to get an overall picture of Ohio's school libraries, including the progress they had made in recent years and the needs which still existed. Without such statistics school administrators and citizens could not compare the library resources in their own school districts with others in the state.

Two valuable, but limited, studies were conducted in 1955 and 1966. Since then Ohio's school libraries had increased in number. In addition, the federal funds and incentives of Title II of the Elementary and Secondary Education Act of 1965 (ESEA) and Title III of the National Defense Education Act (NDEA) had permitted these libraries to increase their resources. These factors made it even more important to conduct the 1972 statistical study. Future annual compliations will be of even greater value since they can be used to compare changes

---

within individual school districts from year to year in various parts of the state and also to provide an up-to-date, accurate picture of statewide school library resources and services. Information on the quality as well as quantity of resources and services should be gathered in future years.

High School Study, 1955 -- In 1955 Glenn A. Rich made a study which was based on statistics gathered through the High School Principals' report. Because this study includes only high schools and presents information by type of school district rather than by county, results can not be compared with the 1972 findings. Mr. Rich concluded that county school districts were below standards in expenditures, number of personnel trained in library science, number of volumes, and periodicals. Exempted village school districts were in a better condition than county districts, but were still below standards in the number of personnel trained in library science and the number of volumes and periodicals. City school districts were in a better condition than other types of school districts, but they still needed "improvement in the training of teachers and designated librarians in Library Sciences."[2]

OASL Study, 1966 -- The Ohio Association of School Libraries and the Ohio Education Association conducted a study in 1966 through a representative sampling of city, exempted village, and county school districts. An eight page questionnaire was sent to building principals of 3066 elementary schools and 1,145 high schools as listed in the Ohio Education Association's files.

A report[3] based upon the results of 1,374 returns (32%) of the questionnaires, included these findings:

. . . About eight of every ten Ohio schools has an organized school library in the building. The larger the school the greater the chance of a central school

library.

. . . While city and village schools make greater use of local public libraries, rural schools make greater use of bookmobiles. Very few school libraries are open at times other than school hours.

. . . Forty-six percent of the school libraries are staffed by at least one trained librarian. One out of every four "librarians" has no library training. School librarians in cities have, in general, higher preparation levels than their counterparts in villages and locals.

. . . Two-thirds of the audio-visual programs are the responsibility of staff other than an audio-visual director or librarian. Audio-visual personnel are found twice as often in city schools as in rural schools. More than one-third of the audio-visual directors reporting had no college credit in audio-visual education.

. . . Forty percent of the schools reporting spent between $1.00 and $2.00 per pupil for library books and magazines. Fifty-one percent spent over $2.00.

State Library Study, 1972 -- Data for the State Library's 1972 study was gathered from a questionnaire which accompanied the Principal's Report form for all grades, K-12. This questionnaire consisted of a single sheet, front and back. A sample copy of the form with a reduced page size is on page 25.

The following report describes the methods used to carry out this study, presents some of the data collected, and analyzes this compiled data in areas of personnel, materials, and expenditures. The report uses statistics on materials and expenditures to show which schools meet the standards set by the Ohio Department of Education. The statistical summaries include ones for certificated school librarians, per capita book collection, per capita expenditures, and schools meeting standards for volumes and expenditures. These statistical summaries show which areas of the state have particular strengths or weaknesses and suggests relationships among the categories examined.

I. Methodology

After receiving the completed questionnaires the State Library staff separated them by county and type of school district (city, exempted village, county, and non-public).

Each questionnaire was given a code number and the following items were coded for keypunching: name of school district, name of school, type of school district, county, enrollment, and IRN (information retrieval number). Since the questionnaire was designed to gather data for comparison with standards, it requested information on the number of hours of library science completed by staff rather than the types of certificate. The standards make no specific mention of certification; instead they prescribe the number of hours of course work librarians must have completed to meet standards. Because it was also important to determine the number of schools staffed by persons holding certificates as a librarian or as an educational media specialist, the State Department of Education supplied computer printouts, produced the year before, which named the schools with staff who had certificates.

The two types of certificates now in use resulted from the evolution of the school library into an educational media center under the direction of an educational media specialist. A person with twenty semester hours of educational media (course work in selection, utilization and production of educational media; bibliography; reference tools; cataloging and classification, and organization, administration and utilization of the educational media center) is certificated by the State Department of Education under the term educational media specialist rather than librarian. Many persons, however, who were certificated as librarians under the older regulations still maintain this title.

In this report, the term librarian is used for persons certificated either as librarians or as educational media specialists. A person who works in more than one library, but full-time in a district, is considered a full-time person in that district.

To determine whether or not a school contained a library/media center as a separate facility, the total square footage was considered. When the size was 900 square feet (the size of the standard classroom) or larger it was considered to be as a separate facility.

The back of the questionnaire was coded to be keypunched except for the entries under "fiction" and "non-fiction", and although each entry was not included in the summaries, totals were calculated from them.

To make the analysis complete a form was required for every school in Ohio. Forms therefore had to be constructed for the 15% of the schools which did not return completed questionnaires. The Ohio Educational Directory was used to supply name, IRN, type of school district and enrollment for these missing schools. The statistical data requested on the back of the questionnaire is not given in the Ohio Educational Directory and therefore could not be supplied for these schools.

Some returns gave totals for the entire district rather than for individual schools. Therefore while district and county totals accurately correspond to the data reported, statistics for individual schools are not uniformly available and therefore are not included in this report. Without complete returns from all schools and without improved verification procedures, by the State Library staff, totally accurate calculations are not possible.

Replies to certain questions indicate that additional work is needed in the design of the questionnaire and a more detailed set of definitions needs to accompany the form when it is sent out to schools. The questions which seemed to create the most problems were B-1 and B-2 concerning facilities. The question, "Is the Library/Media Center a separate facility?", was interpreted by some to mean: "Does the school have two rooms -- one used as a library and one used as a media center?" others interpreted it to mean, "Does the school have a library or media center which is used solely for this purpose?" The question asking for

total square footage in the library/media center also presented problems. Some gave measurements, while others left the answer blank.

Section D on library materials presented few problems. The section for "Reference", which was included because Ohio standards require "reference materials" in the library, did not allow space for reporting series of books which contain more than one volume. "Audiovisual" was too limiting in headings. Under the heading "Other" were reported such varied items as globes, charts, flashcards and torsos. The headings under Section E, fiscal data, were too general for some districts and too specific for others. Some schools include equipment and supplies together while others divided equipment into library equipment and audio-visual equipment which is kept in the library/media center and that which is housed in individual classrooms.

Although this study provides some measure of the strengths and weaknesses of Ohio school libraries, these statistics perhaps have most significance as benchmark data for measuring change over a period of years. They represent a start in a statewide statistical program which will require considerable refinement in future years. Cooperation between the State Library and the National Center for Educational Statistics in the U.S. Office of Education would assist this effort, and would also generate data for comparisons with other states.

Tables included in this report show how individual counties compare with statewide averages and which school libraries in Ohio meet state standards. Staff of the State Library developed formulas to show which schools meet the minimum Ohio's standards. The Ohio Department of Education developed these standards and published them in Minimum Standards for Ohio High Schools, revised 1968; Minimum Standards for Ohio Junior High Schools, 1968; and Minimum Standards for Ohio Elementary Schools, 1970.[4]

---

[4]State of Ohio, Department of Education, Minimum Standards for Ohio High Schools (ed. rev.; Columbus: Department of Education, 1968).

State of Ohio, Departmartment of Education, Minimum Standards for Ohio Junior High Schools (Columbus: Department of Education, 1968).

State of Ohio, Department of Education, Minimum Standards for Ohio Elementary Schools (ed. rev.; Columbus: Department of Education, 1970).

The ALA Standards for School Media Programs,[5] produced by American Library Association and National Education Association (ALA/NEA) and now under revision are often also used for evaluating the adequacy of resources and programs. This study however, does not attempt to measure Ohio's facilities against these standards.

II. Overview of the State

Ohio's schools have 2.7 million children enrolled in grades K-12. Of these, 2.4 million are enrolled in the public schools. The 620 public school districts operate a total of 4,213 school buildings, of which 1,716 have central libraries. Of the state's 846 private schools, 265 have central libraries. The total book collection of the public schools is 21 million volumes, and that of the private schools is 3 million volumes.

Total public school expenditure reported for library purposes in the school year 1971-72 was $36 million (approximately 13% was federal money) of which $6.9 million was spent for books and $2.6 million for other materials. Of the $3 million spent by private schools, $.7 million were used for books and $.6 million for other materials.

Table 1, reprinted from the Ohio Directory of Libraries, 1973 (pages 92-95), provides statistics for each of the eighty-eight counties and the statewide totals.

(1) "Bldg." represents the number of school buildings in that county. "Sep. Libr." represents the number of buildings having a room used exclusively for library/media center purposes.

(2) Material expenditures include: books, periodicals and newspapers, microforms, audio-visual.

(3) Total expenditures include: salaries and wages; library materials (books, periodicals and newspapers, microforms, audio-visual); equipment; supplies.

* Total of local and federal funds.

School library media center resources and expenditures vary greatly from county to county. Table 2 shows the wide variations existing among Ohio schools as reflected in the highest and lowest statistics. Questionnaires were received from one-room schools with an enrollment of 12 as well as from large metropolitan systems serving several thousand pupils.

Table 2. Counties with Highest and Lowest Statistics

Factor	Low County		High County	
Enrollment	Vinton	2,480	Cuyahoga	328,893
Number of Buildings	Vinton	6	Cuyahoga	444

III. Certificated Personnel

Of the 4,213 school buildings in Ohio, 1,716 have facilities used solely for library/media center purposes. According to standards set by the State Department of Education at least 3,900 school buildings in Ohio should have a separate library/media center and be staffed by at least one certificated librarian/educational media specialist. Only 1,182 certificated librarians/educational media specialists work in all of Ohio's public schools.

Only seventeen counties in Ohio have certificated librarians in 30% or more of the schools. Thirty-four counties have certificated librarians in 20-29% of the schools; twenty-seven, 10-19%; ten, below 10%. On a statewide basis, 28%

of the schools in Ohio have certificated librarians. Table 4 gives data for the twenty counties with percentages equal to or above the statewide average.

Table 4. Counties Equaling or Exceeding Statewide Average in Percentages of Certificated School Librarians

County	Enrollment	School Buildings	No. of Certificated Librarians	Percentage of Buildings having Certificated Librarians
Geauga	15,433	31	16	51
Cuyahoga	328,893	444	223	50
Hamilton	184,702	239	99	42
Medina	25,597	38	16	42
Clermont	27,040	41	13	41
Erie	20,414	37	15	40
Fairfield	19,118	35	13	37
Summit	124,499	172	63	37
Richland	31,395	56	19	33
Pickaway	10,556	24	8	33
Portage	31,250	51	17	33
Hancock	14,032	33	11	33
Lorain	64,767	105	33	31
Allen	24,375	39	12	30
Knox	9,826	23	7	30
Lake	50,625	81	24	29
Licking	27,986	65	19	29
Montgomery	134.689	181	53	29
Hardin	8,446	21	6	28
Warren	23,462	38	11	28
Totals	1,177,105	1,754	678	
Statewide	2,430,497	4,213	1,182	28

In these twenty counties (22% of the state's counties) are found nearly 48% of the student enrollment in Ohio, 41% of the buildings, and 57% of the certificated librarians. Of the 1,182 certificated school librarians 516 or 44% work in five counties: Cuyahoga, 223; Hamilton, 99; Franklin, 78; Summit, 63; and Montgomery, 53. These five counties include the cities of Cleveland, Cincinnati, Columbus, Akron and Dayton. The majority of certificated librarians are employed if not in the larger cities, then in the Standard Metropolitan Statistical Areas.

The remainder are located throughout the state.

Table 5. Counties with the Lowest Percentages of Certificated School Librarians

County	Enrollment	No. of School Buildings	No. of Certificated Librarians	Percentage of Buildings having Certificated Librarians
Mercer	11,180	29	3	10
Perry	8,241	20	2	10
Shelby	10,875	29	3	10
Guernsey	7,701	23	2	8
Belmont	15,727	39	3	7
Monroe	4,945	16	1	6
Champaign	8,658	20	1	5
Harrison	4,363	17	1	5
Highland	7,826	17	1	5
Jackson	7,249	19	1	5
Van Wert	6,705	22	1	4
Hocking	4,877	15	0	0
Paulding	5,652	10	0	0

A study of the counties with the lowest percentages of school librarians reveals that 16% of the state's counties have 4% of the state's enrollment which is served by 1% of the certificated school librarians and is located in 15% of the school buildings in Ohio. After looking at the counties having the highest and lowest percentages of certificated librarians we find that the remaining counties in the state (62%) have 48% of the enrollment in 44% of the buildings with 42% of certificated school librarians serving them.

The standards for certificated school librarians established by the Ohio Department of Education and presented in Chart A, call for a certificated school librarian in at least 3,900 Ohio schools. The state now has 30% (1,182) of the number required to meet these standards.

Chart A
Standards for Personnel

Elementary[6]

"Each elementary school shall have the services of a certificated person responsible for the multi-media program (print and non-print materials). Non-certificated persons shall be under the supervision of the appropriately certificated person."

Junior High[7]

Enrollment	Assignment	Training in Library Science
300 or less	1/2 time	8 semester hours
301 - 499	3/4 time	16 semester hours
500 and over	Full-time	Certificated or 24 semester hours

Senior High[8]

Enrollment	Assignment	Training in Library Science
300 or less	1/2 time	12 semester hours
301 - 499	Full-time	16 semester hours
500 and over	Full-time	24 semester hours or certificated as a librarian

[8]State of Ohio, Department of Education, Minimum Standards for Ohio High Schools (ed. rev.; Columbus: Department of Education, 1968), p.21.

IV. Book Collection

The total number of volumes available in public schools in Ohio in 1972 was 21 million. With an enrollment in public schools of 2.7 million pupils, the number of books per student for the state is 8.6. Less than eight books per student are available in twenty-eight or 32% of Ohio's counties.

Twenty (22%) of the counties are above the statewide average in percent of certificated librarians, and 60 (68%) of the counties are above the statewide average in per capita book collection as measured within the limitations of this

study. The standards use important phrases such as "well selected" and "up-to-date" to qualify the quantities but this study has no means of measuring the application of these.

On the sixty counties which are above the statewide average, fifteen have more than eleven books per capita and three have less than five books per capita. Table 6 gives the data for these counties.

Table 6. Per Capita Book Collection

County	Enrollment	Above 11 Per Capita Collection	County	Enrollment	Below 6 Per Capita Collection
Columbiana	25,345	17	Fayette	8,407	6

Comparison of data on materials expenditures with the data on per capita holdings suggests the problems in understanding the figures in Table 6. Larger collections of materials per student combined with smaller expenditures per student in the counties where there are fewer certificated librarians may mean that collections in these counties may not have had such vigorous evaluation with systematic withdrawal of unsuitable titles as have counties where more certificated librarians serve. Often the most important first work of a newly appointed librarian is to "weed" the collection of out-dated and unnessary books.

While Table 6 shows counties with the highest and lowest per capita book collection for school libraries, it does not show which counties meet standards set by the Ohio Department of Education for the number of volumes. Fifty-six percent of the schools in Ohio meet these standards. Table 10 gives a county summary of these statistics.

The standards for number of volumes are listed in Chart B along with the counties having the highest and lowest percentages of schools meeting the requirements while a breakdown of all eighty-eight counties is shown in Chart C.

Since standards are different for elementary, junior high, and high school, each individual school was matched against the appropriate formula. Totals were then determined for the number of elementary, junior high, and high schools in each county which met the standards and from this a percentage was reached for each county. Table 12 shows the numbers of schools in each school district throughout the state which meet standards for number of volumes.

Chart B
Standards for Number of Volumes Per Pupil

Elementary Schools[9]

Enrollment	Number of Volumes
300 or less	A minimum of 10 books per pupil
301 - 499	3,000 volumes plus 5 books per pupil over 300 pupils
over 500	4,000 volumes plus 3 books per pupil over 500 pupils

Junior High or Senior High Schools[10]

Enrollment	Number of Volumes
499 or less	5,000
500 - 999	5,000 for the first 500 pupils plus 4 volumes for each additional pupil
1,000 - 1,999	7,000 for the first 1,000 pupils plus 3 volumes for each additional pupil
2,000 or more	10,000 for the first 2,000 pupils plus 2 volumes for each additional pupil

[9]State of Ohio, Department of Education, Minimum Standards for Ohio Elementary Schools (ed. rev.; Columbus: Department of Education, 1970), p. 111

[10]State of Ohio, Department of Education, Minimum Standards for Ohio Junior High Schools (Columbus: Department of Education, 1968), p. 21.

State of Ohio, Department of Education, Minimum Standards for Ohio High Schools (ed. rev.; Columbus: Department of Education, 1968), p. 23.

This table shows the counties with the highest and lowest percentages of schools meeting standards. The seven counties, in which 80% or more of the schools met the standards for number of volumes are: Allen, 89%; Geauga, 87%; Auglaize, 86%; Ashland, 85%; Jackson, 84%; Greene, 81%; Clark, 81%. Eight counties having the lowest percentages for meeting standards in number of volumes include: Pickaway, 29%; Madison, 25%; Carroll, 22%; Noble, 22%; Hocking, 20%; Guernsey, 17%; Vinton, 16%.

The statewide breakdown in chart C indicates how many counties fall into each percentage range.

Chart C
Statewide Range for Percentages of Schools
Meeting Standards for Number of Volumes

Percentage	Number of Counties	Percentage	Number of Counties
89 - 80%	7	49 - 40%	12
79 - 70%	9	39 - 30%	11
69 - 60%	20	29 - 20%	6
59 - 50%	21	19 - 10%	2

V. Per Capita Expenditures

A relationship can be found among per capita statistics for book expenditures, materials expenditures, and total expenditures. Counties ranking high in one of these categories usually are also high in one if not both of the other categories. It should be noted that "materials expenditures" include figures for books, periodicals, newspapers, microforms, and audio-visual; while "total expenditures" includes all items included in the library/media center budget. For Table 7 arbitrary figures were selected for the cutoff points.

Table 7. Highest Per Capita Expenditures

County	Enrollment	Above $3.50 Per Capita Book Expenditure
Wayne	21,268	$ 12.20
Carroll	4,214	7.22
Richland	31,395	5.20

Athens	10,261	5.54
Fairfield	19,118	5.52
Delaware	10,690	5.25
Fulton	8,915	5.21
Muskingum	19,328	5.14
		3.88

County	Enrollment	Above $15.00 Per Capita Total Expenditure
Wayne	21,268	$ 49.98
Knox	9,826	27.03
Cuyahoga	328,893	26.53
Wood	10,724	26.45
Geauga	15,433	23.19
Harrison	4,363	18.97
Scioto	18,999	18.63
Portage	31,250	17.35
Tuscarawas	19,238	17.34
Henry	7,059	16.95
Erie	20,414	16.79
Fairfield	19,118	15.77
Fulton	8,915	15.64
Marion	16,288	15.56
Lake	50,625	15.27
Montgomery	134,689	15.10

For the lowest per capita expenditures which are given in Table 8 arbitrary figures were chosen for limitation factors. A relationship similar to the one found in comparing highest per capita expenditures is apparent when the counties having lowest per capita expenditures are considered. Counties low in per capita book expenditures also are low in one or both of the other categories. Table 9 gives per capita expenditures for all counties.

Table 8. Lowest Per Capita Expenditures

County	Enrollment	Below $2.00 Per Capita Book Expenditure	County	Enrollment	Below $3.00 Per Capita Materials Expenditure	County	Enrollment	Below $10.00 Per Capita Total Expenditure
Coshocton	8,402	$ 1.94	Clark	37,038	$ 2.99	Holmes	4,620	$ 9.82

			Vinton	2,480	.78	Clinton	9,379	6.58
						Adams	6,107	6.54
						Belmont	15,727	6.16
						Vinton	2,480	5.03
						Hocking	4,877	4.71
						Guernsey	7,701	3.22
State average		$ 2.83			$ 3.88			$14.97

Seventy-five percent of the schools in Ohio meet standards set by the Ohio Department of Education for total library expenditures per pupil. Chart D shows the standards followed in determining this.

Chart D

Standards for Expenditures Per Pupil

Elementary School[11]

Enrollment	Annual Expenditure
300 or less	$3.00 per pupil
301 - 499	$900.00 for the first 300 pupils plus $2.00 for each additional pupil
over 500	$1,500.00 for the first 500 pupils plus $1.50 for each additional pupil

Junior High and Senior High School[12]

Enrollment	Annual Expenditure
499 or less	$450.00 for the first 200 pupils plus $2.00 for each additional pupil
500 - 999	$1,050.00 for the first 500 pupils plus $1.50 for each additional pupil
1,000 or more	$1,800.00 for the first 1,000 pupils plus $1.00 for each additional pupil.

[11]State of Ohio, Department of Education, Minimum Standards for Ohio Elementary Schools (ed. rev.; Columbus: Department of Education, 1970), p. 109.

[12]State of Ohio, Department of Education, Minimum Standards for Ohio Junior High Schools (Columbus: Department of Education, 1968), p. 21.

State of Ohio, Department of Education, Minimum Standards for Ohio High Schools (ed. rev.; Columbus: Department of Education, 1968), p. 23.

While counties with the highest and lowest percentages of expenditures per pupil are listed in Tables 7 and 8, Table 11 shows the number of schools in each county which meet standards for expenditures per pupil.

A similar analysis gives the percentages of schools which meet standards for expenditures per pupil. Table 13 shows the individual districts in each county which meet standards for expenditures per pupil. The ten counties with 90% or more school districts which meet standards are: Noble, 100%; Geauga, 96%; Clark, 96%; Defiance, 95%, Allen, 94%; Preble, 94%; Montgomery, 92%; Miami, 92%; Richland, 92%; and Ashland, 90%. The three counties which were below 40% in the percentage of districts which meet standards are: Wyandot, 33%; Guernsey, 21%; and Vinton, 16%. An analysis for all counties is found in Chart E.

Chart E

Statewide Range for Percentages of
Schools Meeting Standards for Expenditures Per Pupil

100%	-	1	59 - 50%	-	12
99 - 90%	-	9	49 - 40%	-	5
89 - 80%	-	24	39 - 30%	-	1
79 - 70%	-	22	29 - 20%	-	1
69 - 60%	-	12	19 - 10%	-	1

VI. Implications

The 1955 study showed that school libraries, on the whole, in Ohio were lacking in the number of trained personnel. County districts and exempted village districts were also lacking in funds and in the number of items of printed material. Federal funds have alleviated the problems somewhat by making it possible for schools to increase their resources and add more trained personnel.

Although the current 1972 study approaches school statistics differently, it shows that Ohio school libraries are still lacking in appropriate numbers of certificated personnel. The per capita expenditures vary greatly from county to county and still need to be raised considerably in most counties to meet the standards set by the Ohio Department of Education.

The 1972 study, like the 1955 study, surveyed only the quantity of resources in schools libraries/media centers. The 1966 study, however, attempted to survey the quality of service as well. Questions regarding extent of library service, book selection, other uses of library, objectives of school library and activities of librarian attempt to measure some aspects of the program besides materials and finances. If such types of information could be elicited from all schools in the state it would show the kinds of library service all students in Ohio

schools were receiving. A study containing questions covering both qualitative as well as quantitative aspects of the school library program could be of great value in determining goals and objectives for further development of the program.

While this 1972 study needs improvement in its methodology, it is a beginning for future research. It gives the researcher a starting point for gathering more statistics and it provides school librarians and administrators with a view of the entire state and also of each county.

At present there are no earlier statistics with which these can be compared, but the tables make it possible to compare current resources by district.

The information in this study is presented in the belief that school librarians and administrators will use it to find areas of strengths and weaknesses in their own schools as well as throughout the state. It is hoped that future studies, based on improved questionnaires, will gather the same types of statistics for the measurement of change and also additional information which will aid in the assessment of resources and service programs.
